 <https://leetcode.com/u/anshsneha6223/>

Skills

Technologies — React.js, Node.js, Express.js, Typescript, Nest.js, RTSP

Languages — JavaScript, Java

Database — SQL, MongoDB

Version Control — Git

Web Development — HTML, CSS, Bootstrap

Cloud — AWS

Professional Experience

01/2022 – Present

Infochips(An Arrow Company), Engineer

- Developed backend systems for efficiently interacting with **video streaming** and **recording** services using **RTSP** protocol for live video feeds using **Node.js** and **RESTful APIs** with **Express.js**.
- **Integrated a geographical map** using **Mapbox** in the UI to visualize real-time data for video surveillance System (IOT).
- Integrated **JWT authentication** to secure user access and manage user permissions.
- Handled file uploads using **Multer**.
- Designed and developed a web Portal for managing EV Chargers using **React** using **Redux** for state management, **Formik** and **Yup** for validation with **Axios** for API integration. Used **XML**, **MongoDB** and **SQL** for data storage.
- Implemented **OAuth authentication** to securely manage user access and ensure seamless integration with third-party services.
- **Migrated legacy codebase** from **PHP** to a modern stack using Node.js and React, improving application performance and user experience.

06/2021 – 08/2021

CodeQuotient, Full Stack Developer Intern

- Developed an e-commerce website using React and Node.js to display products from a backend server along with user authentication system with JWT and bcrypt for secure sign-in and registration.
- Added live chat functionality for communication between customers and sellers using **socket programming**.

Projects

2025

Event Ticket booking, Node.js, Express.js, React.js, Next.js, MongoDB, Redis, TypeScript, Docker, Kubernetes, JWT, Event Bus Architecture

- Developed services in **Node.js** and **Express** with **MongoDB** and **Redis** for data persistence, and implemented **asynchronous event-based communication** between services using a custom event bus.
- Built the frontend using **React** and **Next.js**, utilizing server-side rendering and modern UI patterns.
- Containerized the entire system using **Docker**, and orchestrated services with **Kubernetes**, deploying them to a scalable cloud-based environment.

- Implemented **JWT-based authentication** and ensured secure, structured API communication across services.
- 2024
- Used Car Pricing API, Backend Developer** [↗](#)
- Allows users to estimate and report used car prices with role-based authentication using **NestJS Guards**.
 - Managed database migrations with **TypeORM**.
 - Structured scalable, modular, and reusable codebases with **TypeScript** and **dependency injection**.
 - Utilized NestJS features including Guards, Interceptors, and decorators to secure endpoint logic.
- 2024
- Feedback Collection App, React, Redux, Express, MongoDB** [↗](#)
- Developed a full-stack web application combining React frontend with Redux state management and Express/MongoDB backend.
 - Implemented user authentication, including **Google OAuth**, to secure user sessions and data access.
 - Built reusable form components using **Redux Form** for efficient user input and navigation.
 - Integrated **Stripe API** to handle secure credit card payments and billing workflows.
 - Automated email communication for user engagement and feedback collection.
 - <https://github.com/SnehaBharti04/Emaily> [↗](#)
- 01/2023 – 04/2023
- Proof-of-Concept (POC): Memory leak Detection, Python, Numpy, Matplotlib, Valgrind, Scan build**
- Implemented memory leak detection script and created corresponding CSV files for analysis.
 - Created HTML reports to display critical information and results from the test suite.
 - Significantly, Reduced time consumed by teammates in detecting memory leaks before every release

Education

2018 – 2022 **B.E (Computer Engineering), Poornima University** [↗](#)

Languages

- English
- Hindi

Interests

- Badminton
- Gaming

Certificates

Microsoft azure Fundamentals AZ-900

Applied Scrum for Agile Project Management [↗](#)

AWS Cloud Foundation

Advance Nodejs Certificate
<https://github.com/SnehaBharti04/NodeJS-Certification> [↗](#)
